

"Esther is a pillar in the Finance department. She entered the Finance department at a time of true turmoil and trepidation as a lead for the water department where she played a significant role with the automated meter reading system. Later, she was elevated to her present position as Finance Coordinator. She took on a; if not the, major role in the conversion to Springbrook software and has diligently worked to keep the Finance department current in the face of insurmountable pressures.

Every now and then a person enters your life that is a genuine human being. A hard worker, that supports her friends and coworkers and goes the extra mile (several miles in fact) to help when needed. That is the personification that Esther displays."

*~ Ken Rhone, Finance Director*
