

Mr. Smith,

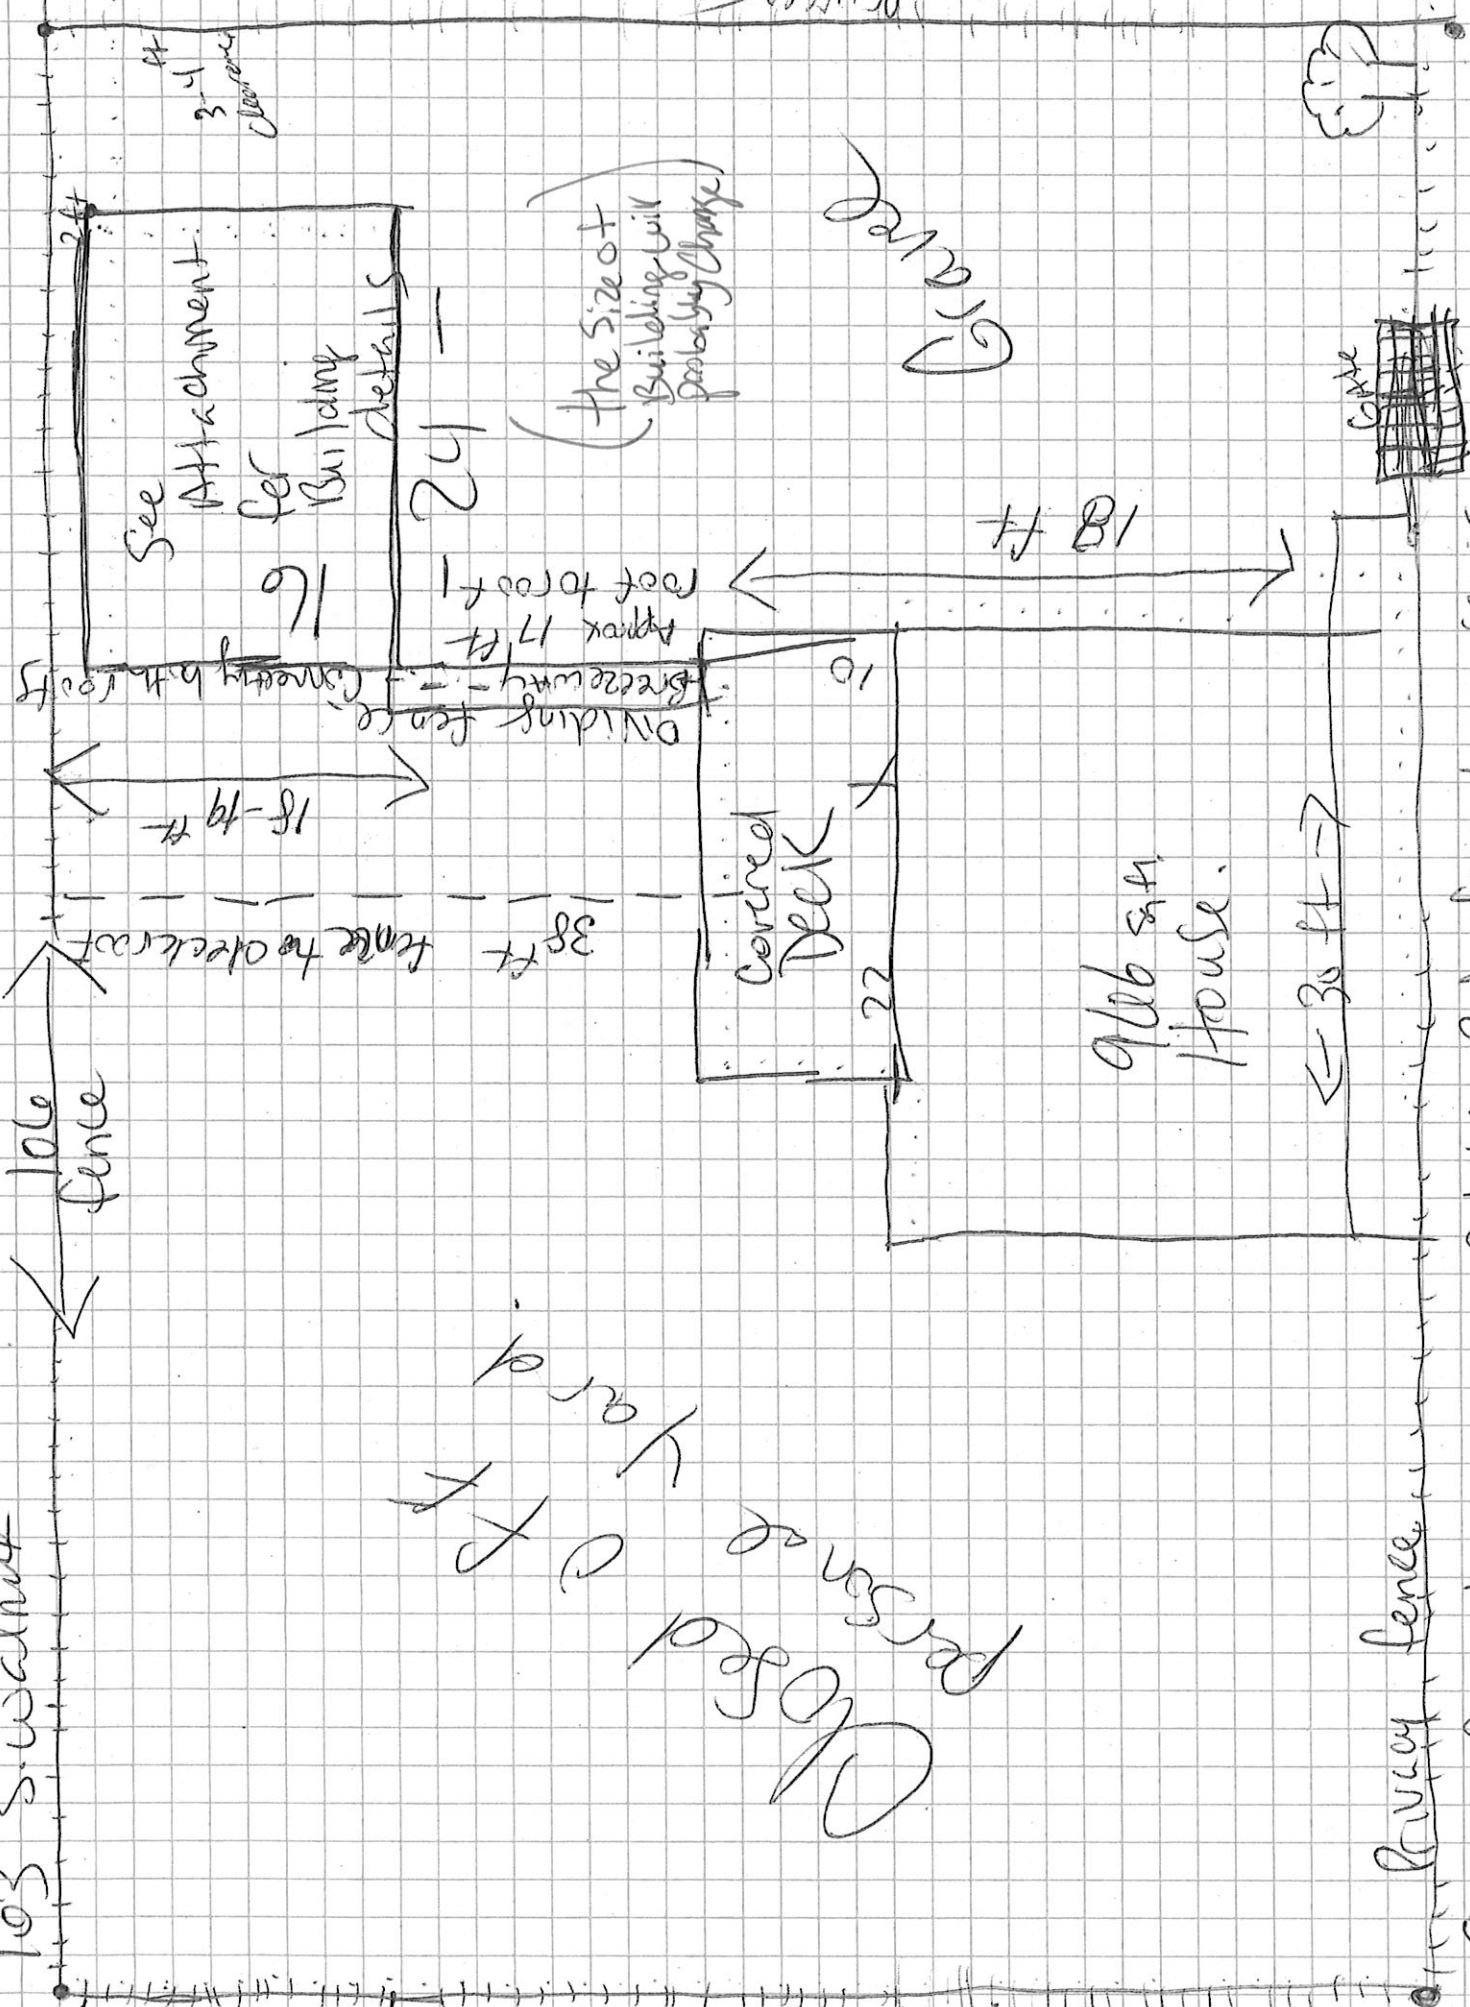

Here is the graphing you suggested. The building is probably going to be a little bigger more like a 12x40 or 14x36. I'm not doing a slab anymore it will be either built on site or built & moved to property. I emailed you earlier because I don't have a direct phone number for you. I'm trying to follow up with you to find out the details you were checking into. I'm off today so if you could contact me at your earliest convenience.

Thank you,

Angie Stevens
